Greeting

This screenshot shows the Visual Studio Code editor with the file 'greetingfrom.html' open. The code is an HTML document with a form. The form has a title 'Greeting Formulario', three input fields for 'name', 'edad' (age), and 'numero' (number), and a 'Saludar' (Greet) button. The form is styled with a light blue background and rounded corners.

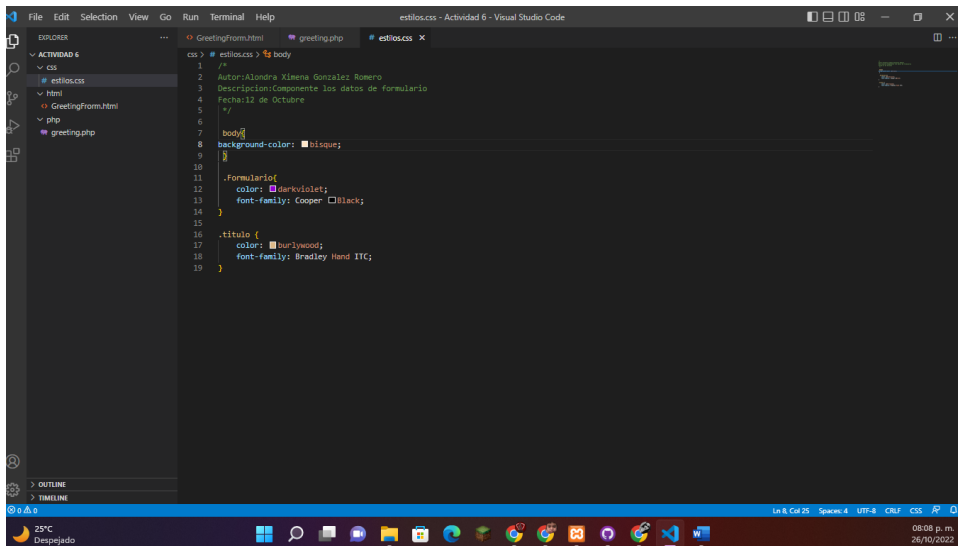

```

This screenshot shows the Visual Studio Code editor with the file 'greeting.php' open. The code is a PHP script that processes the form data from 'greetingfrom.html'. It uses the \$_POST superglobal to get the values of 'name', 'edad', and 'numero', and then echoes them back to the user with a greeting.
